- Integrated water resource management (IWRM) approaches

- Advanced modeling techniques for water system analysis
- Climate change adaptation and mitigation measures

li>Water resource economics and financing

Empowering Professionals and Students

'Water Resources Planning and Management' is an invaluable resource for a diverse audience, including:

- Water professionals seeking to enhance their technical abilities
- Undergraduate and graduate students pursuing careers in water resources management
- Policymakers and stakeholders involved in water resource decision-making

With its clear and engaging writing style, real-world case studies, and interactive online resources, this book provides a practical and accessible to the complexities of water resources planning and management.

Key Features of the Book

- **Comprehensive Coverage:** Explores all aspects of water resources planning and management, from hydrology to economics and policy.
- **Cutting-Edge Research:** Incorporates the latest advancements in the field, including IWRM, climate change adaptation, and water resource economics.
- **Real-World Case Studies:** Illustrates key concepts and principles with real-world examples and case studies from around the globe.

- **Interactive Online Resources:** Provides access to additional materials, such as problem sets, datasets, and interactive maps.
- **Engaging Writing Style:** Written by experienced water experts, the book presents complex topics in a clear and engaging manner.

Testimonials from Industry Leaders

"This book is a must-read for anyone involved in water resources planning and management. It provides a comprehensive overview of the field and the latest advancements in our understanding of water resources. Highly recommended!" - Dr. Peter Gleick, President Emeritus, Pacific Institute

"Water Resources Planning and Management is an essential resource for students, practitioners, and policymakers. It provides a solid foundation in the principles and practices of water resources management, and it effectively addresses the challenges facing water resources in the 21st century." - Dr. Ken D. Frederick, Professor, Resources for the Future
